Respected Dr Sahib,

Greetings!

Thank you so much! for your timely and caring assistance and attention with my father (last month). You are the only "conventional" Dr my mother (and I) would trust blindly when it comes to a family member or friend etc!

Only one regret though - that I did not get the opportunity to say hello! (after such a long gap) However, over the past several years since I last met you (GBPant hosptl) I've followed your progress and achievements. Needless to say me and my mother are extremely proud! ~~of them~~ And we are fortunate to know you not just as an eminent physician but as a person as well.

Anyhow, I'm almost at the half century mark (Aug)! (Hard for some to believe) and while I've been rather blessed (till now) with no major health difficulties I don't want to take more risk by avoiding a conventional health screening / evaluation - Holistic treatment while extremely helpful and accurate is not 100%. Fool proof I'd like clinical confirmation that all is OK and to deal with any risk factors that ~~may~~ are present. Towards this end - I'd like to register for the disease prevention screening advertised at your hospital - with the faith that it will be under your personal supervision?

Mom's health hasn't been very good for some time as well - I'm trying to persuade her to go for a full (senior citizen) evaluation - So, that heaven forbid if she ever

needs hospital care - at least we have some clinical information to offer the attending physician/s.

Date:

That's about all - Once again thank you! We know you are extremely busy and free time is probably a very rare "phenomenon" but if you do have some - Do stop over at home. ~~so~~ We'd all be delighted and honored to have you come and learn about all your stories from G.B Pant Hill now!

Thanking you,
All the very best!

Health & peace!

God bless!

Sincerely

Shashikant Jain
& family.
